

BTC infusion pumps approved for reimbursement on the Prescribed List

Melbourne, Australia: **BTC health** (ASX: BTC) (the **Company** or **BTC**) is pleased to announce that the drug infusion pumps distributed by its investee company, BTC Speciality Health Pty Ltd, have been admitted to the Prescribed List of Medical Devices, with effect from 1 November 2024. This provides automatic reimbursement from private health insurers when private hospitals use the infusion pumps.

The new reimbursement codes include the Elasto-Q pump, the only soft-shell, variable flow rate single-use infusion pump available in the market, and the electronic Rhythmic Evolution pump, which is multifunctional and reusable.

Executive Chairman and Managing Director Dr Richard Treagus commented, "We are extremely pleased to have secured reimbursement for our products, and this provides certainty of access for our hospitals and their patients. Our team can now actively switch our customers to these newer generation drug infusion products with complete confidence they will be reimbursed by private health insurance."

Authorisation

This announcement was authorised for release to the ASX by the board of directors of BTC health Limited, Level 1, 10 Oxley Rd, Hawthorn, VIC 3122.

About Elasto-Q and Rhythmic Evolution infusion pumps:

BTC Elasto-Q™ is an elastomeric, single-use infusion pump designed to allow clinicians and nurses to deliver pre-determined amounts of medication to their patients continuously and accurately, either in a hospital or home setting. It provides multiple delivery flow rate options and is used in various clinical applications, such as continuous regional nerve blocks, surgical site infusions and intravenous medications.

Rythmic™ Evolution is an electronic, ambulatory infusion pump designed to meet the safety and reliability that clinical professionals and patients expect. It offers a step change in managing chronic and palliative pain with various innovative features, accessories and delivery systems.
